

## LEARN, SHARE AND GROW 2023 Online Program

In 2022,  
**97.6%**  
of participants  
confirmed they had  
learned something  
new

Exclusive for Community members, the 2023 Online Program is designed to bring our community together with a range of online events and engagements. The program focuses on expert learning and collaboration, building on successful formats to enhance networking opportunities and advance sustainability reporting knowledge and practice around two key streams:

### Learn from the Experts

#### Reporting in Practice (RP)

*Practical in-depth webinars about transitioning to the updated Universal Standards for new and experienced reporters.*

Broaden your perspective on the revised Universal Standards and explore opportunities to improve your reporting process through focused case studies on how to use the GRI Standards.

During five online sessions, participants hear directly from GRI experts and receive practical insights from GRI Community members and external specialists.

### Network and Grow

#### Global Member Meetings (GMM)

*Quarterly virtual gatherings to stay up-to-date on the latest developments and find inspiration from our global community.*

The Global Member Meetings are an opportunity to come together and stay up-to-date on the latest trends in sustainability landscape. Hear from GRI about the most recent developments, strategic priorities and work in the pipeline. Members also have a space to share their perspectives, ask questions and participate in the discussion.
